

# Life As We Made It: In Conversation with SJTP Fellows

Wednesday, November 10, 2021  
4:00 PM - 6:00 PM

Join us in celebrating the launch of SJRC affiliate faculty Beth Shapiro's new book, Life as We Made It: How 50,000 Years of Human Innovation Refined—and Redefined—Nature (Basic Books, 2021).

Science & Justice Training Program Fellows Jonas Oppenheimer and Jenny Pensky will present findings from their collaborative research project exploring the relationships between “invasive” plants and colonialism, as well as put their work into conversation with Shapiro's *Life as We Made It*.

“Anyone who wants to better understand the future of life—human and otherwise—should read this book.”  
—JENNIFER DOUDNA, winner of the 2020 Nobel Prize in Chemistry
